

KANIKA

GitHub: github.com/codeNkanika Email: codenkanika@mail.com

SKILLS

- **Languages:** Python, Java, C++
- **Data & Querying:** SQL, Excel
- **Databases/Tools:** MySQL, PostgreSQL
- **Web:** HTML, CSS, JavaScript
- **Foundations:** Data Structures & Algorithms, Design and Analysis of Algorithms

PROJECTS

Photobooth-Love | [Live Site](#)

- First project, entirely vibe-coded — an online photostrip app built to put HTML, CSS and JavaScript into practice while learning them.
- Frontend-only build for now, with no backend integration yet, so no data is stored or saved permanently.
- **Tech Stack:** HTML, CSS, JavaScript

NotToNote | [Live Site](#)

In Progress

- Second project — a notes-taking app built after not finding an online note-taker that worked the intended way.
- Still basic in scope, with the backend not yet connected; actively being developed and improved.
- **Tech Stack:** HTML, CSS, JavaScript

cineWatch | [Live Site](#)

- Third project and the first with a real backend — a to-do-list-style app for movies.
- Lets users organize movies into three states: currently watching, already watched, or planning to watch.
- **Tech Stack:** Python, APIs, HTML, CSS, JavaScript

EDUCATION

Lovely Professional University

Bachelor of Technology - Computer Science and Engineering (AI & Data Engineering); CGPA: 9.03

Phagwara, Punjab

Aug 2025 - Present
